

Water Activity Standard 0.75aw NaCl Solution

1. This water activity standard solution used for water activity meter calibration.
2. It is suitable for all water activity meters that can be universally used.
3. Standard aw value temperature is 25°C (77°F).
4. Each PET bottle is 30ml

Note:

1. It is saturated solution of sodium chloride, **if there is white powder precipitated out of the bottle**, it is sodium chloride crystals, rinse off with water, it does not affect the use.
2. If inside has some crystal NaCl, means it is ok, if all liquid without any NaCl crystal, it is not okay, please add some NaCl, shake it and waiting for 1 hours later to use.
3. If you have any questions please contact us by email amtast1@gmail.com
